2

Medium-Priority Findings (P2)

5

Low-Priority Findings (P3)

1

Priority Findings Register

Finding ID	Finding	Investigation Priority	Quality_Dimension
DQ-01	Missing dosage is concentrated in diagnostic test products, with a small additional group of malaria records.	P2	Completeness
DQ-08	Missing line-item insurance values with variation across product groups and shipment characteristics.	P2	Completeness
DQ-05	Potential duplicate shipment records with identical non-ID attributes.	P2	Uniqueness
DQ-03	Pricing arithmetic differences and recorded-precision relationship	P3	Consistency
DQ-02	Two date fields contain recognized non-date workflow labels alongside explicitly unavailable values. No other unparseable text was found across the five audited date fields.	P1	Validity and interpretability
DQ-06	Weight and freight fields mix numeric values, cross-record references, and explanatory text.	P1	Usability
DQ-07	Weight and freight values contain references to other records	P2	Referential integrity
DQ-04	Zero unit prices observed across 103 records, including a concentrated product-specific pattern in HIV safety-lancet records.	P2	Validity
